Notes & Details

Perfect for toasting sandwiches, melting cheese, and finishing pizzas or flatbreads, the EasyRose countertop conveyor oven is a great choice for sandwich shops, cafes, diners, and pizzerias. It features a 14" wide belt, making it ideal for low- to medium-volume use. The adjustable heat shield can be raised or lowered to suit the height of your dish—raise it for taller items like sandwiches or nachos, and lower it for pizzas and flatbreads to retain more heat. Independently controlled top and bottom heating elements let you customize the heat direction based on what you're preparing. With 7 adjustable belt speeds, you can fine-tune the cooking time for different items. The removable crumb tray makes cleanup easy, while the stainless steel construction ensures durability and easy maintenance. The exterior stays cool to the touch for added safety. This unit requires a 208V electrical connection and is not recommended for cooking raw ingredients, dough, or toppings.
