## Notes & Details

Designed for the dedicated pitmaster, the Hakka Professional Digital Smoker combines industrial-grade durability with precision culinary technology. Please note that this unit is engineered specifically for 110V/60Hz North American power standards, delivering a potent 1000W for rapid heat recovery even in colder climates. For optimal performance and a deep "Smoke Ring," we recommend preheating the fully insulated cabinet for 20 minutes before engaging the Side-Loading Wood Chip System. While the digital panel offers "set and forget" convenience up to 12 hours, the integrated temperature probe allows for real-time internal monitoring to ensure food safety and perfect tenderness. Every unit comes fully equipped with a comprehensive accessory kit, including 8 dishwasher-safe stainless steel racks and 10 hanging hooks for versatile smoking styles.
